## Suggestions

Students majoring in economics are advised to complete the required two MATH courses and the ECON 111 Introduction to Economics, ECON 332 Microeconomic Theory, ECON 333 Macroeconomic Theory, and ECON 334 Introductory Econometric Analysis courses no later than the middle of their junior year. Mathematics and statistics are essential
tools for graduate education and professional work in economics. The department therefore advises that students who are contemplating graduate study in economics minor in mathematics, with students taking MATH 119 Calculus I, MATH 120 Calculus II, MATH 239 Linear Algebra, MATH 305 Multivariable Calculus, MATH 345 Mathematical Statistics I, and either MATH 343 Analysis I or MATH 346 Mathematical Statistics II. In addition, ECON 350 Topics in Econometrics and Data Analysis should be included among the economics courses taken for the major.
